## VERMEND MEASURING PLATE Easy measurement for drainage and partitions

- Easy installation
- Made in Denmark
- Available in 2mm stainless steel 304
- Write-on surface for noting dimensions
- Keep an eye on your measurements and avoid errors
- Ensures compliance with the dimensions of partitions and sewers by specifying the dimensions on the spot

# Vermend

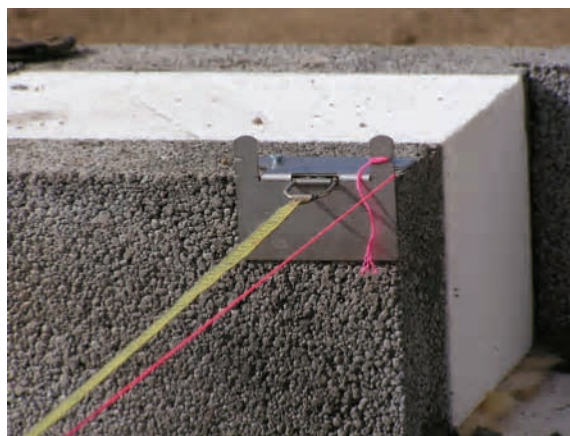

Fasten the measuring board with two nails or screws.

Wrap one end of a cord twice around the top slot and fasten the other end at the fixed point.

Write the measurement with a felt pen on the measuring plate.

You can attach a tape measure to the plate to measure the inside dimension.

The advantage of the measuring plate from Vermend is that you can write down notes and dimensions directly on the work site. You get a better overview of your measurement and minimise the risk of errors.

Improves the accuracy of your measurement.
